

● Golf Sync

FOR COURSES & MULTI-LOCATION OPERATORS

Put a local-brand offer in every golfer's hand — and prove it landed.

Golf Sync turns your bays and your scorecard into sponsor real estate, with a scan-to-shop code you can actually track.

A PROMO CODE THAT EARNS ITS KEEP

"Shop local, 15% off with code RVA15" is a great offer — if golfers see it and you can tell it worked. Golf Sync puts a sponsor's offer **on the scorecard and on a scannable code at the bay**, then shows you the scans, so the next sponsor conversation starts with a number.

A CODE IN AN EMAIL

One send, no idea who saw it, no proof for the sponsor beyond "we mentioned you."

A CODE GOLFERS SCAN IN THE BAY

The offer rides the scorecard + a QR at the screen. Every scan is counted — real proof you reached their buyers.

AT THE TURN • PRESENTED BY

Bag Boy

"15% off the Nitron push cart — code RVA15" · scan-to-shop on every bay

FOR THE COURSE / OPERATOR

- | | |
|--|---|
| ✓ Scorecard-first player experience | Your course on the player's phone during the round — the natural place to layer a sponsor offer or a turn coupon. |
| ✓ Per-hole signage + scan-to-shop QR | Branded hole signs and bay screens carry the sponsor's logo and a trackable code. |
| ✓ Saved offers & turn coupons (rolling out) | Golfers save a deal to redeem later — recurring value for a local-brand sponsor. |
| ✓ Multi-location ready | Run the same sponsor across every location — Scott's Addition, Rocketts Landing, wherever you are next. |
| ✓ Tracked impressions & scans | Hand the sponsor a number: how many golfers saw the brand and scanned the code. |
